

Environmental charter

Dear guest, welcome to the Grand Hôtel d'Orléans !

Our hotel exists since 1856, and maintaining its original state has been a real challenge. Major renovations had to be carried out in order to allow the hotel to survive and adapt to standards.

Today, we have decided to go further in our approach, and the current context has motivated us to do everything possible to reduce our environmental impact as much as possible.

For this purpose, we commit ourselves :

- **To make our partners and customers aware of this approach**
- **To train and support our staff**
- **To buy responsibly and choose committed suppliers**
- **To sort and reduce our waste**
- **To monitor and reduce our energy consumption**
- **To monitor and reduce our water consumption**
- **To guarantee a healthy atmosphere, using health-friendly cleaning products**
- **To guarantee a diet that respects the diversity of dietary regimes**
- **To contribute to the development of the local economy**
- **To prioritize environment friendly means of transport**

In this context we aim to obtain the "Clef Verte" label ("Green Key"), the first sustainable tourism label, developed by the association "Teragir" which will support us in our efforts.

The label is intended to promote accommodation structures and restaurants committed to a voluntary environmental approach.

The label is awarded each year by a jury made up of experts and professionals in tourism and environment. It certifies the conformity of establishments with respect to a certain number of criteria.
